

Dotacalculator.com

Dotacalculator will focus on bringing all necessary equations and graphs into one place.

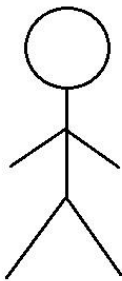

Dotacalculator will focus on bringing all related equations and graphs into one place. In a game focused so much on information, Dotacalculator will walk through how each damage is being calculated. These equations will be explained for users who do not understand higher tier math. Accompanied graphs will show how the equations scale as the numbers change.

Personas

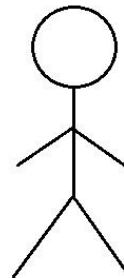

New Player

Brand new to the game, heard about "dota equations". Focuses on learning about the topic.

Casual Player

Have known about "dota equations", but got curious how the numbers are really calculated. Focuses on becoming more familiar with the math.

Hardcore Player

Knows how "dota equations" work, but not necessarily quick at the math. Focuses on memorizing rough estimates.
